

## Using Product Activation Wizard to check out license

1. In the main window select “NON-SELECT or Node Locked user”

**Product Activation Wizard**

**Product Activation Wizard**  
The Product Activation Wizard assists in the initial activation (licensing) process.

Please select your installation type. Please refer to your system administrator or Bentley Technical Support if you have questions.

SELECT subscriber activating against a hosted (Bentley) SELECTserver.

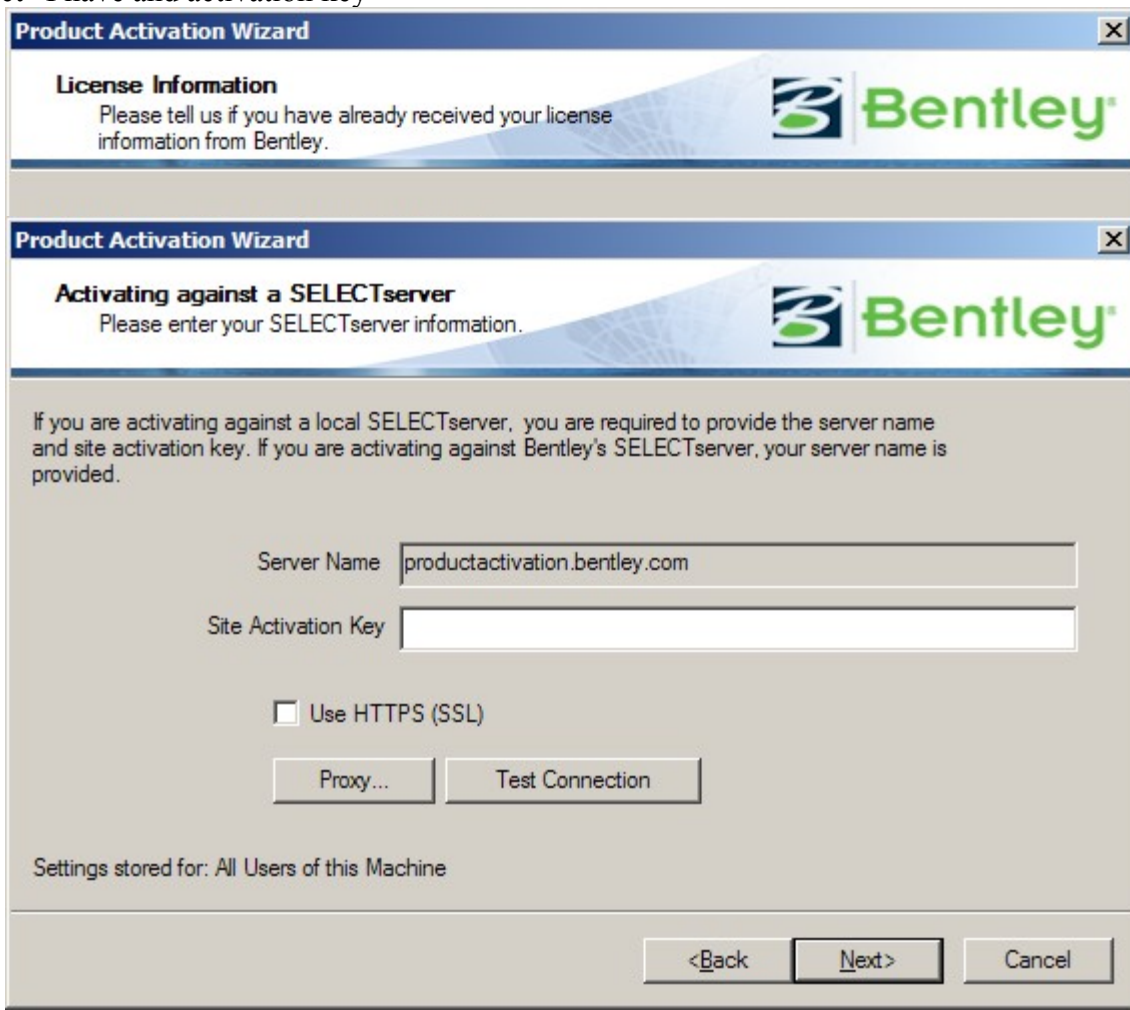

SELECT subscriber with a deployed (local) SELECTserver

**NON-SELECT or Node Locked user**

Evaluation Only - No license information

<Back   Next>   Cancel

2. Select “I have an activation key”

**Product Activation Wizard**

**License Information**  
Please tell us if you have already received your license information from Bentley.

**Product Activation Wizard**

**Activating against a SELECTserver**  
Please enter your SELECTserver information.

If you are activating against a local SELECTserver, you are required to provide the server name and site activation key. If you are activating against Bentley's SELECTserver, your server name is provided.

Server Name

Site Activation Key

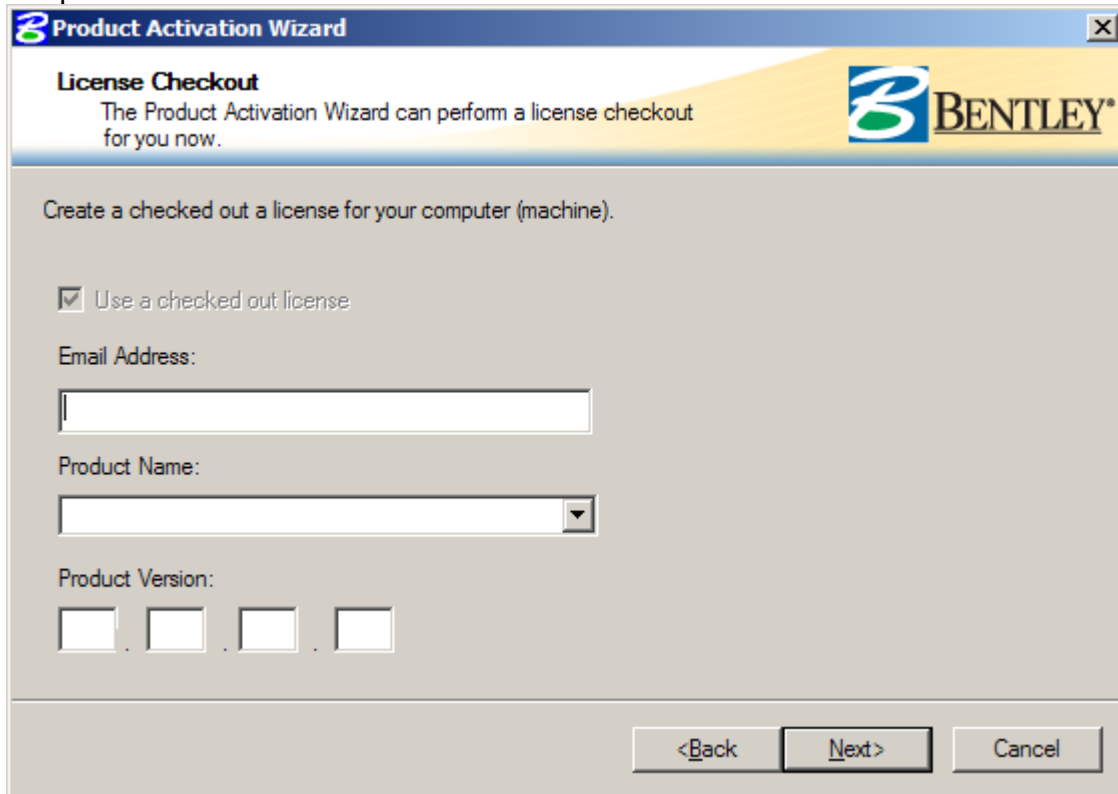

Use HTTPS (SSL)

Proxy...   Test Connection

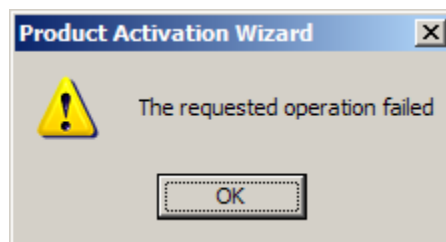

Settings stored for: All Users of this Machine

<Back   Next>   Cancel

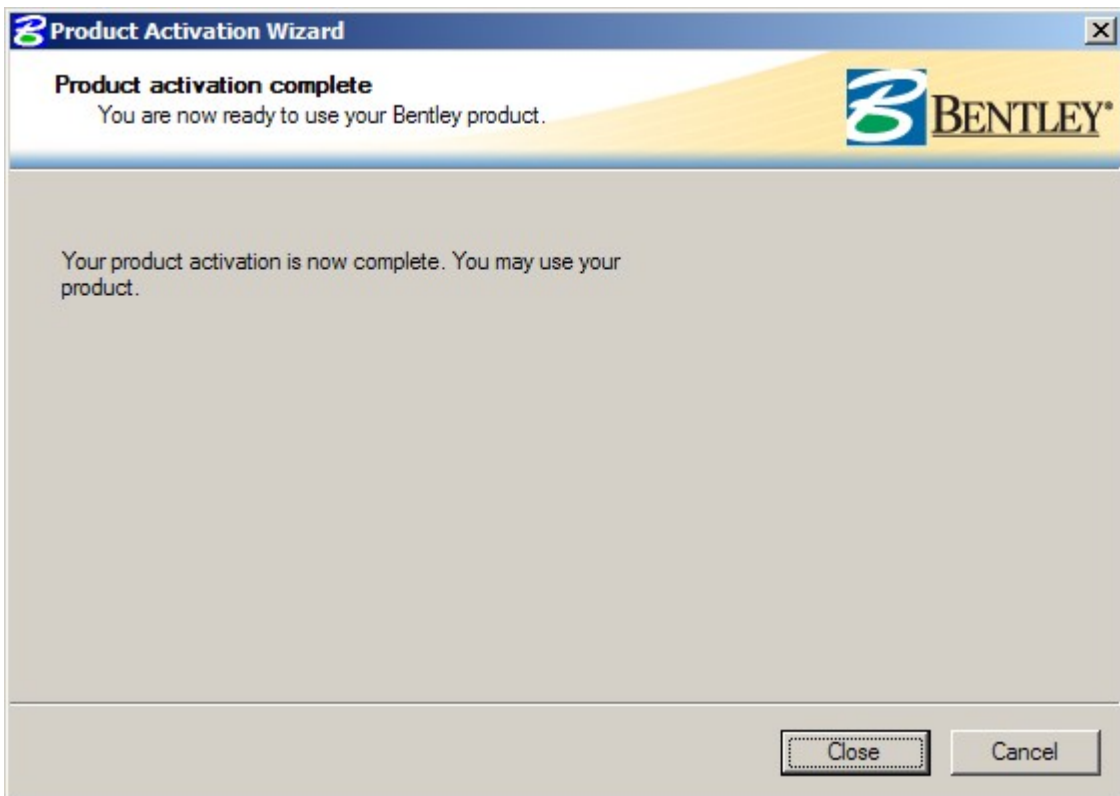

3. Enter your license information. Enter your activation key into “Site Activation Key” field, and hit “Test Connection” to ensure that activation key is working and you can connect to server
4. Fill in required information to checkout a license

- 4.1. Enter your email address into “Email Address:” field
- 4.2. Select a product you want to check out
- 4.3. Enter product version
5. You should see window with entered information summary, if information is correct press “Finish” to check out your license
6. You may get a message saying “The requested operation failed”, just press OK and try using your software

7. Close the last window

8. You have successfully checked out a license
